HR SOFTWARE

WE WELCOME...

FAMILY OFFICE FINANCIAL SERVICES, LLC & THE BROAD FOUNDATIONS

TO PEOPLE-TRAK HRIS, A LEADER IN HR SOFTWARE!

Family Office Financial Services was currently using another HRIS for tracking their employee information. They needed to make a decision whether to update their current HR System or select a new HR software vendor. Having seen People-Trak, HR software a couple years prior, they decided to look into People-Trak further.

Their key requirements included tracking time off, benefits, email functionality, alerts, security and an easy to use report writer. Having multiple companies, they really liked People-Trak's Multi-Company feature where they could keep each company as separate entities, in separate data bases without incurring extra cost for their HR System. They also were concerned on how they could get their data out of their current HR system into People-Trak. People-Trak's user-friendly Import/Export feature eliminated all their data conversion worries.

We are excited to welcome Family Office Financial Services to People-Trak HRIS, a leader in HR software!
