WE WELCOME...

PEOPLE OF COLOR NETWORK

TO PEOPLE-TRAK HRIS, A LEADER IN HR SOFTWARE!

People of Color Network is an administrative and management organization designed to promote services through collaboration. PCN is the focal point for information regarding the well-being of the minority community in Maricopa County and the state of Arizona.

Since its inception in 2000, People of Color Network (PCN) adopted three operating principles:

- Provide quality, culturally, and linguistically appropriate services to consumers.
- Become a force in Maricopa County and Arizona through strong advocacy for people of color communities.
- Strengthen partner agencies through collaboration.

When People of Color Network first visited People-Trak's website looking for HR software, they were happy to see our pricing listed on our website. Being a non-profit organization they needed to find an HRIS solution that would fit within their budget and still have the functionality that was important to their company.

Tracking Time & Attendance using a point system was high on their list of requirements. Initially they thought they would have to purchase an additional "clock-in and out" time piece separately. With the purchase of People-Trak's Employee/Manager Self -Service (ESS/MSS), they can use the online time sheet for not only tracking hours off, but also tracking hours worked. People-Trak's fully integrated report writer allows them to easily report on hours based on point in time.

We are very happy to welcome People of Color Network to People-Trak HRIS, a leader in HR software!
