

SafetyManagement

Safety Management provides for detailed accident/incident reporting. This allows you to produce all the government compliance reports and documents you need including the OSHA 300, OSHA 300A, and OSHA 301 reports. Safety Management also tracks worker's compensation details, including costs for rehabilitation, liability, medical, and more. In addition, there are many reports included that help you schedule training, pinpoint problem areas, control costs, and take corrective actions.

Feature

Fully integrated with Personnel Module

Tracks contact information

Tracks demographic details

Tracks OSHA details

Tracks accident details

Tracks corrective actions

Tracks initial treatment details

Benefit

Easy selection of the employee involved in the incident. Contact information and demographics, automatically updated to Safety record.

Maintain and manage safety information for employees even after they have been archived in the Personnel Module; allows documents, letters, and labels to be mailed to the employee.

Create detailed reports regarding safety incidents based on location, age, seniority, gender, job title, supervisor, and department.

Allows production of OSHA 300, OSHA 300A and OSHA 301 reports at any time. Details include the incident result, fatalities, lost days, restricted days and summaries regarding the incident.

Develop statistics based on equipment, operations, causes, body parts, and injury to create and maintain a safety plan; assists in the development of corrective actions and helps to foresee future problems.

Shows OSHA actions taken to prevent future incidents and tracks costs of corrective actions to maintain proper safety.

Documents all actions taken in regard to the incident to assist in claim management and settlement.

SafetyManagement

Feature

Benefit

Tracks claim details

Provides necessary information to administer any workers compensation claims associated with the incident; keeps insurance and legal contact information associated with the claim readily available and allows extensive reporting.

Tracks incident costs

Allows detailed reporting of incident costs over a variety of categories such as medical, rehab, legal, indemnity, damages, etc.; provides summary and detailed costs.

Enter claim cost details in batches

Saves time when claim statements and other cost items are to be recorded; provides a detailed audit trail of all costs recorded.

Produces OSHA Reports

Instantly print or reprint the OSHA 300, OSHA 300A, and OSHA 301 reports as desired.

The screenshot displays two overlapping windows from the People-Trak Safety Management software. The background window is titled '2015 - Broken Leg' and shows 'Accident Details'. The foreground window is titled '2015 - Broken Leg' and shows 'Claim Management'.
